Benefits

- Named Service Manager
- Access to Our Entire Team of Global DBA Professionals
- Dedicated Connectivity With Data Intensity SecureConnect
- eBonding IT Service Management Integration
- Service Management Through ServiceNow Platform
- Monthly and Quarterly Performance Service Reporting
- Available OS and Infrastructure Support

The availability and performance of your mission-critical data are essential to your business processes. Without proper DBA coverage and capacity to ensure your critical database systems are aligned with the speed of business, your ability to grow and expand is completely stifled.

Finding the time and resources to balance day-to-day administrative activities with the need and know-how to implement new cutting-edge projects slows the pace of your business growth. Additionally, in the digital economy of ubiquitous DB platforms and deployment models, how can you ensure that the right platform choice is matched to your business process needs?

How are you preparing for the shift from database administrator (DBA) to database engineer (DBE)? It's time to leverage the expertise and bandwidth of an experienced Managed Services Provider to drive down costs and expand capacity and capability across any platform, on-prem or cloud-based.

Committed to Deliver Business Outcomes for Our Customers

How We Help

Ensuring maximum cost efficiency, capability, capacity, and coverage to manage your critical database services, Data Intensity enables you to focus on growing your business and strategic initiatives to include:

- + Availability Management
- + Performance Management
- + Incident and Problem Resolution
- + SLA/SLO Compliance
- + Upgrades, Security, and Disaster Recovery
- + OS, Infrastructure, and Other Services.

In addition to providing world-class managed DB services at scale, Data Intensity also provides architectural design workshops to help customers quickly sort through the proper cloud platforms and options – mapped to their business processes and DB management needs. Our services include response-time SLAs, based on IT service management integration with Data Intensity's service management platform.

Managed Database Services

Data Intensity’s flexible delivery model can be tailored to meet your requirements, allowing you to scale the services you use dynamically as your needs change. Our experts become an extension of your IT team to help ensure your return on investment and plan how best to achieve the near- and long-term goals of your business. We support databases and the systems and infrastructure surrounding them.

Increase

Management Coverage

Data Intensity offers you 24 x 7 true follow-the-sun coverage, with a unique blend of local and global resources.

Lower Costs

Data Intensity’s process-based model breaks the traditional constraints of paying for expensive full-time specialization.
