

Why Data Intensity

A Trusted Managed Services Provider

A Strategic, Cloud-Agnostic, Managed Services Provider

Founded in 2001, Data Intensity is an industry-leading Oracle Managed Services Provider delivering world-class expert managed services for the complex lifecycle of your Oracle-powered workloads. Offering a complete portfolio under one roof, Data Intensity provides full-stack SLA-backed technical and functional application managed services on your cloud of choice.

Our unique differentiation future-proofs your investments in Oracle technologies and applications, from effective license position assessments to 24x7 technical operational managed services and functional adaptation of your E-Business Suite, to optimally power your business. In short, we manage Oracle better than anyone, anywhere. Period.

Data Intensity offers certified, transformative solutions and services to enterprise clients around the globe.

Founded in 2001

Why Work with Data Intensity?

- **A continual focus on investment protection.** Maximize investments across cloud infrastructures. Maintain agility and performance at the lowest cost.
- **Vendor certification and resource breadth and depth.** Credentialed by the industry's leading vendors, we've produced total customer savings nearing \$1B USD, yet maintain a high-touch boutique service approach.
- **Enterprise-class compliance and security capabilities.** You can't afford to miss a beat when it comes to enterprise compliance and security. Manage and monitor them continuously and efficiently.
- **A commitment to strategic flexibility.** Enterprises have similar needs but every implementation is different. We built custom application solutions on proven standards.
- **A hybrid model applied correctly and consistently.** We are a multi-cloud expert, yet cloud-agnostic. Manage your workloads in the cloud, public cloud, or in data centers, while unifying operating models.
- **Cost-management even in a complex IT environment.** Optimizing costs in hybrid/multi-cloud environments is challenging and complicated. Benefit from our expert-grade service levels.

Total Operations Management (TOM)

Data Intensity offers comprehensive managed services for your business-impacting IT landscapes, with features that include 24x7 coverage, proactive monitoring, OS support, backups, and patch management – delivering the same services across cloud platforms for continuity of service.
